Sarah: Today we're going to talk about the weather. Have you checked the forecast today?

Jack: Yes, I have. It's going to be pretty hot!

Sarah: What's the temperature?

Jack: It's going to get to nearly 40.

Sarah: What Jack's talking about is the temperature. That's one of the main things we look at when we check a weather forecast. The temperature can be measured in degrees Celsius or degrees Fahrenheit but in Australia, we use Celsius. In spoken English, you are more likely to hear people say 'degrees' rather than 'degrees Celsius'. Or just the number. Jack, can you give us an example?

Jack: So glad you asked, Sarah! In the South of Australia, it's going to be very hot today. Melbourne will reach a

top of 38 degrees while Adelaide will get to 39. In the East, it's a bit cooler. Sydney will get to a top of 32 while Brisbane will be at 35. Back to you Sarah.

Sarah: In written English, 39 degrees Celsius looks like this: 39°C. Notice capital C. You might that Celsius has a also see a temperature range in the weather forecast. For example, t o m o r might have a high of 38 degrees and low of 20, so the temperature range is 20 to 38 which looks like this: 20 - 38° C. Notice that you don't |s|t|r|e|s|s| the word 'to'. If it's |r||e||a||1||1||y|| cold, youmight see negative temperatures which means they're below zero. For example, it might be negative 10 or you could say 10. But that doesn't |h||a||p||e||n|often in Australia. Now, let's hear some people talk about the weather.

Nic: Ah how good is this weather?

Charlotte: It's a bit too hot for me! I'd prefer the temperature to be in the 20s.

Nic: What do you reckon your favourite temperature is?

Charlotte: Oh, probably about 23.

Nic: See me, I love it above 30 because you can go to the beach!

Charlotte: Is it going to be hot this weekend?

Nic: No, I actually think it's going to be raining on Saturday.

Charlotte: Oh no, I was going to have a picnic!

Nic: Well, on Sunday I think it's going to be sunny again. So you could go then!

Charlotte: What's the temperature going to be?

Nic: I think about 20 to 25 degrees.
